Subject: Request for Information - Service Line Material Update

We are writing to request your cooperation with updating our *Lead and Copper Sampling Plan*, and also gathering information vital for our *Complete Distribution Service Line Materials Inventory (CDSMI)* due January 1, 2025 for the State of Michigan.

As part of our commitment to provide safe and reliable drinking water to our residents, we are required to periodically assess the presence of lead and copper in the water distribution system. To ensure accurate sampling and analysis, it is crucial that we have up-to-date information on the materials used in the service lines connecting homes to our water system.

The information you provide will help us update our records and conduct an accurate inventory of service line materials. This will enable us to identify any potential sources of lead and copper in the water system and take appropriate measures to mitigate any risks.

Therefore, we kindly request that you provide us with the following information:

Please fill out as accurately as possible and email a copy, or return to the Ford River Township

1. **Home Address:** _____
2. **Service Line Material:** Please indicate the material used for your service line by checking the appropriate box below:

 Copper
 Galvanized iron/steel
 Plastic/PVC/PEX (specify): _____
 Other (please specify): _____
3. **Plumbing Material:** majority of plumbing inside your home:

 Copper
 Galvanized iron/steel
 Plastic/PVC/PEX (specify): _____
 Other (please specify): _____

Should you have any questions or require further assistance, please do not hesitate to contact us at: **(906) 241-4346** or via email (water@fordriver.org)

Sincerely,

Troy Rodman, Operator in Charge, Ford River Township Water System
